SafeEntry
- 10 Cyber Security for Server ,Application Enpoint Devcies and Hardening Services

Work From Home Solutions

Enable Remote Workforce To Access Office PCs Securely

Why Do You Need Work From Home?

Problem 1
Every business needs a cost-effective Business Continuity Plan

Problem 2
Growing concern over pandemics like Covid-19

From natural disasters to traffic crawls

Business growth requirements

Problem 3

Problem 4

Concerns With Work From Home

- Unauthorized device, network & location
- Data leak
- BYOD devices
- Malware/Keyloggers
- Provisioning laptops
- Provisioning Apps
- Users' Internet Access

Expected Solutions

- Quick to set up
- Quick to roll out
- Zero endpoint management
- Zero Trust Architecture
- Subscription Licensing
- BYOD capable
- Detailed Auditing
- Security compliant
- Available on cloud/ on premises

Available Work From Home Technologies

- Traditional VPN (have issues with network layer vulnerability)
- Remote desktop (server-based) computing (limited authentication)
- Office PC access via VPN (data leakage concerns)
- Temporary Session based Desktop via VPN (limited hopping controls)
- Virtual Apps & Virtual Desktop Infrastructure (limited DLP & enduser device authentication)

Limitations Of Generic Solutions

- Use network layer to connect, pass on every data to datacentre
- Don't have in-depth device control features
- Don't provide integrated data compliance environment
- Don't offer in-depth login facilities
- Don't have single console for all Work From Home necessities, like OTP, SSL, MFA, data compliance, password management
- Lack remote assist, geo-location & pure seamless environment

COVID-19 Outbreak : How to work from home by using right IT Solution for WFH with correct security in place for all companies to stay focused & Be healthy !.

As a precaution against the novel coronavirus, organizations across the globe are being forced to adapt WFH quickly, including us.

We're seeing a seismic shift in the way companies have adapted their workforce operations to facilitate remote workers, in an effort to protect their employees as they continue to conduct business. And providing service to our customers to help them through these challenging and uncertain times is key for your business and ours to endure through this crisis

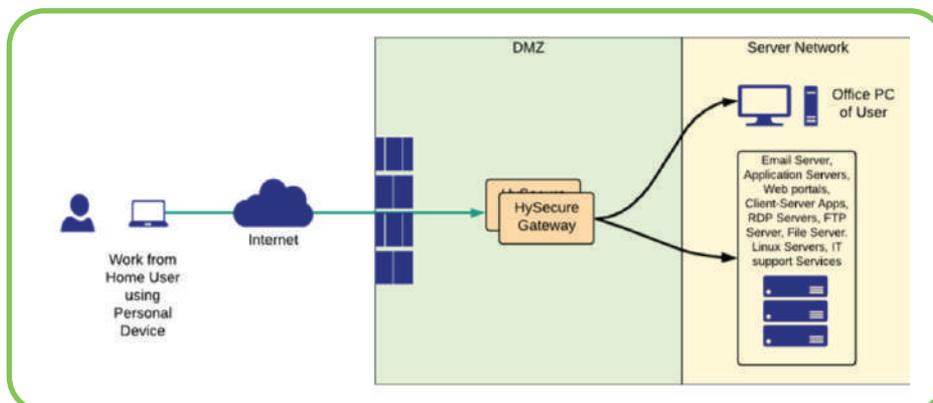

Essential WFH IT tools (Laptop ,Desktop MF Printer & Headset mic)

Sysnet provide right PC \ Laptop and Multi-Function Printers, Headset with Mic based on your business and application needs. we could facilitate to have high-speed internet with essential PC accessories as well as one -stop WFH solutions providers

Telecommuting Staffs Success Starts with Right IT tools and Good IT Support beside the good education to Employee and self-discipline of Employee with right Change management policy in place to Successful WFH

Secure Remote access of office PC , Applications and Data

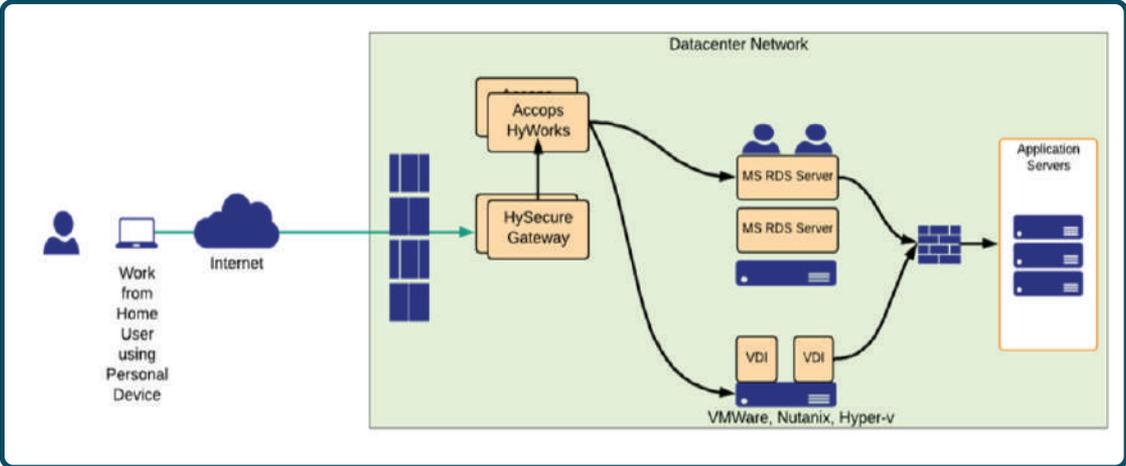

We are providing Accops secure access of office PC , Server Application & Data with below security as bundled options so easy implement and support it

- Endpoint control
- Blocked Internet when accessing office apps & Data
- Block data download
- Block clipboard, print screen, screen recording
- Enable MFA -Multi Factor Authentication
- Enable device restrictions based on identity & health
- Lock down user to specific device

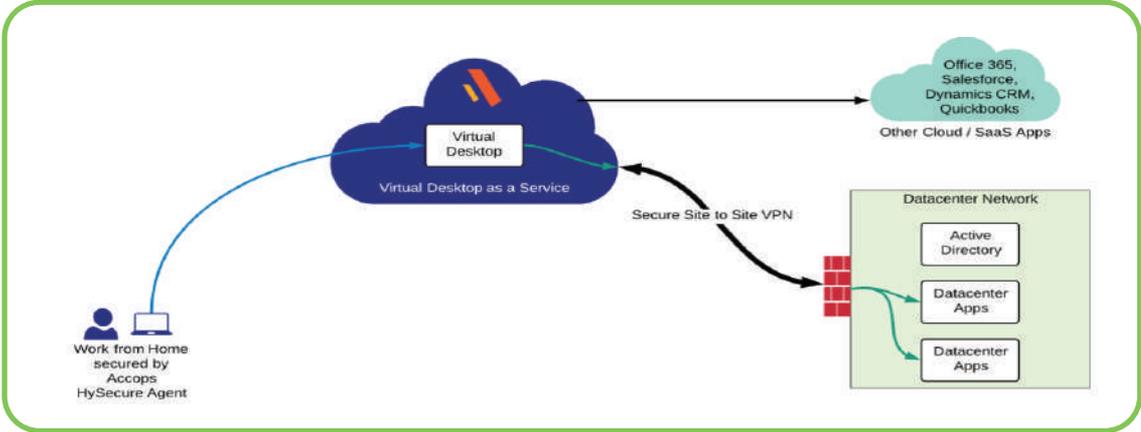

As such, only you and your authorized staff will be able to access the remote systems securely, thus securing the port from hackers and zero-day vulnerability/unpatched exploits.

Virtual Apps/Desktop Access (VDI Solutions)

Users can access virtual apps, session-based desktop or virtual desktop from corporate or personal devices, enabling seamless access to required office resources and applications.

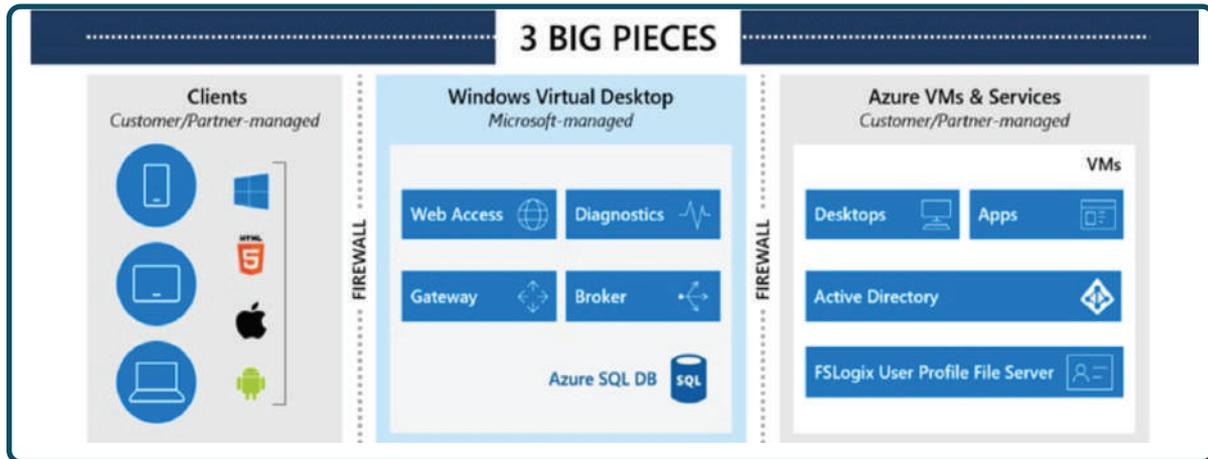

Desktops-as-a-Service

A ready to go live, Desktop-as-a-Service to avoid the complexity of deploying any remote access infrastructure on-premise for short duration. Use pay-as-you-go model to pay for what you use

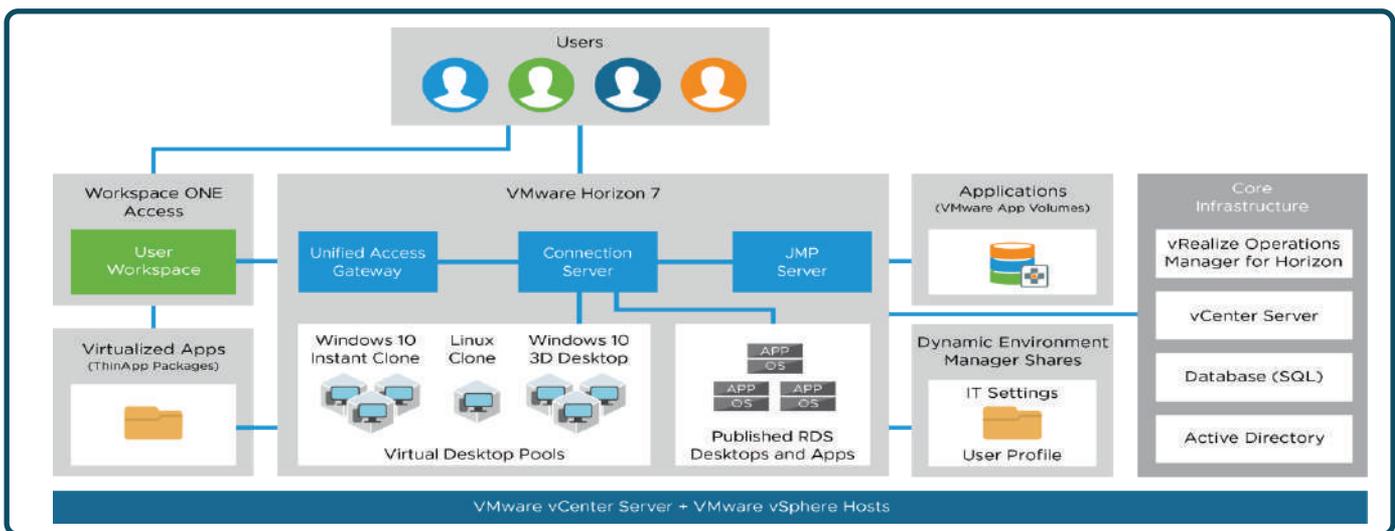

Microsoft Windows Virtual Desktop (WVD) Solutions

We will setup ,Configure and Support of WVD solutions , which will deliver a virtual desktop experience and remote apps to any device. Bring together Microsoft 365 and Azure to provide users with the only multi-session Windows

VMware Workspace ONE and VMware Horizon (VDI) Solutions

We will setup ,Configure and Support of VMware VDI- Virtual Desktop infrastructure solutions in by using VMware Workspace ONE and Horizon Overview. VMware Workspace ONE® is a simple and secure enterprise platform that delivers and manages any app on any device. Workspace ONE integrates identity, application, and enterprise mobility management while also delivering feature-rich virtual desktops and applications.

Cyber Security Solutions for WFH

We are providing end to end Cyber security solution for WFH which will ensure that your network, employees and data are protected from potential threats by providing end to end Cyber security solution:

Permanent security fix is important rather than giving a temporary fix to withstand the ever-changing threats in today's advancing digital world of technology.

MFA-2FA Authentication

We provide Multi-Factor \ Two-factor authentication (2FA) is a second layer of security to protect an Application or system or remote access . Which is one of the best security requirement of additional verification beyond a username and password .Users must go through two layers of security before being granted access to an Application or system or remote access

Comply with Industry best security practices.

Secure Vendor Access -Monitor & Secure Vendor Access

Secure Remote Access

Read only access to personal unmanaged devices outside corporate network.

Strong Endpoint Control

Organizations can manage and have entire control over third party devices.

Applications Consolidation

Provisioning of business applications is controlled by IT team from a single location.

Data Security

Critical data is secured within datacentre with zero data trails on vendor devices.

Scan & authorize external device access based on pre-defined policies.

We will setup and configure Secure vendor access solutions as Enterprises often deal with third party consultants or vendors on a day to day basis for various projects. Enterprises hardly have any control over the vendor endpoints and this is a serious threat for enterprises. With Accops products and our service, enterprises are able to govern the business data and restrict access to managed devices only. Enterprises using Accops can enable instant vendor access without having to worry regarding security.

Robotic Process Automation (RPA) Solutions

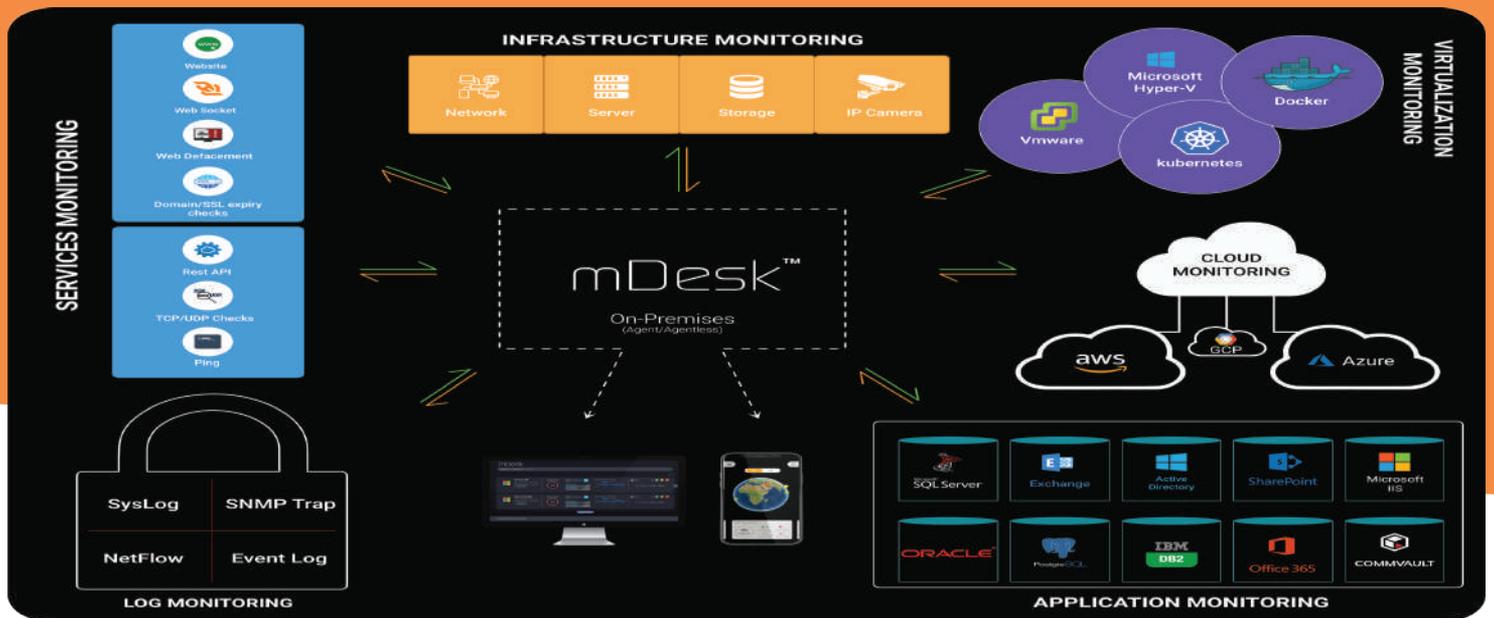

We do provide RPA solutions which will Automate Your Routine Tasks Quickly and Cost Effectively with Robotic Process Automation. Easily integrate Processes & Decision Automation to Expand Your Automation Program. Reduce Costs. Quick Automation. Scales With Your Business. Easy to Integrate with existing application.

Robotic Process Automation has Saved Businesses Years of Manual Work. Freedom from Manual Tasks. Reduce Operation Costs. Digital Transformation.

Centralised Infra monitoring Solutions for both on-premises and Cloud System

We provide the centralised monitoring platform offers a single unified interface for tracking all the vital, dynamic resources your business relies on, whether in the cloud, on-premises, or a combination. It gives customer the comprehensive monitoring insight needed to ensure business services perform optimally always.

MDESK provides comprehensive, end-to-end service monitoring that helps detect, prioritize, isolate, diagnose and prevent problems before they impact users, and the business itself. It brings together information application instrumentation that is dynamically linked to the infrastructure.

All this information is displayed in actionable dashboards, relevant context to all stakeholders, including those not in IT.

Solution to Sign Digitally

Digital signatures, like handwritten signatures, are unique to each signer. Digital signature solution providers, such as DocuSign, follow a specific protocol, called PKI. PKI requires the provider to use a mathematical algorithm to generate two long numbers, called keys. One key is public, and one key is private.

Collaboration & Communication tools (Cloud- Email , Cloud -IP Phone ,PlanningTools,WebEx & VC)

A collaboration tool helps people to collaborate. The purpose of a collaboration tool is to support a group of two or more individuals to accomplish a common goal or objective.

From instant messaging to video conferencing tools (the best alternative to face-to-face meetings), there are many options for team collaboration tools:

Cloud-based solution designed for business communications to help teams manage chat, meetings, file sharing, team

Cloud Server ,Cloud CRM , Cloud Application and Cloud Data hosting

We will suggest ,Setup ,Configure & Support best cloud based server Hosting , Application hosting and Cloud based Storage solutions of Infrastructures as a services (IAAS) specially designed for your business needs and Hosted in Singapore Datacentre with very attractive cost in 3 flower of hosting

Cloud HR Mobile App Attendance

Mobile app is a cloud-based attendance system. It is a low cost, easy-to-use solution to manage roster / shift effectively. No need costly investment for any time clock. Simply install the app in mobile for employee to record attendance on 24/7 basis. Attendance is captured base on face recognition, this avoid buddy punching which is an extremely frustrating issue for company. Attendance record is real time transfer, easy for tracking and checking.

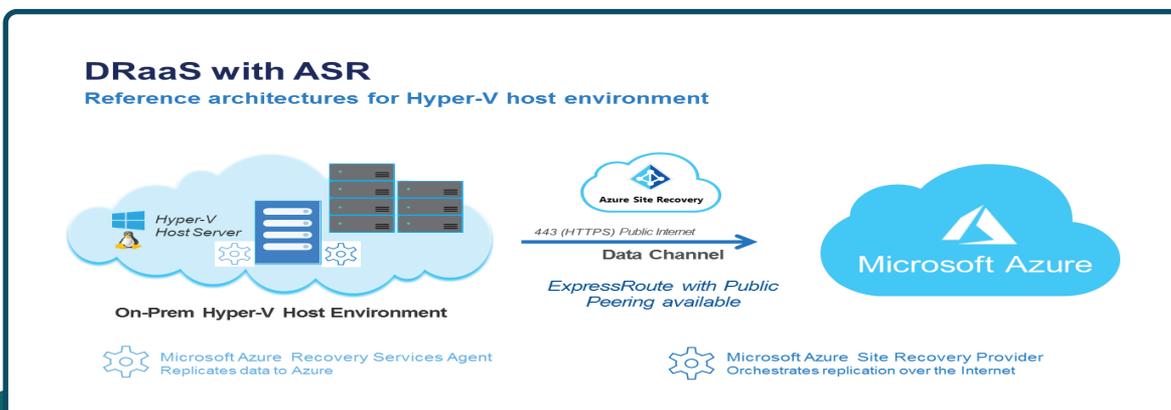

Cloud IP PBX System for stay connected

Has the pandemic exposed your business communications? Can your employees work productively from home using voice apps and web conferencing? Conduct remote business meetings without requiring apps? Service customer requests via website live chat? Future proof your business during the lockdown and beyond with 3CX PBX:

Easy to manage Cloud PBX built for teleworking

BCP Work space and Co-Location Services

At this COVID-19 Situation More demand for Co-working spaces , Servers & Application CO-Location services as firms split operations

Sysnet can facilitate Co-working space based on your business needs as many companies now days looking to co-working spaces to conduct split operations as part of their business continuity planning (BCP) amid to protect the employee ,Managements and Customers

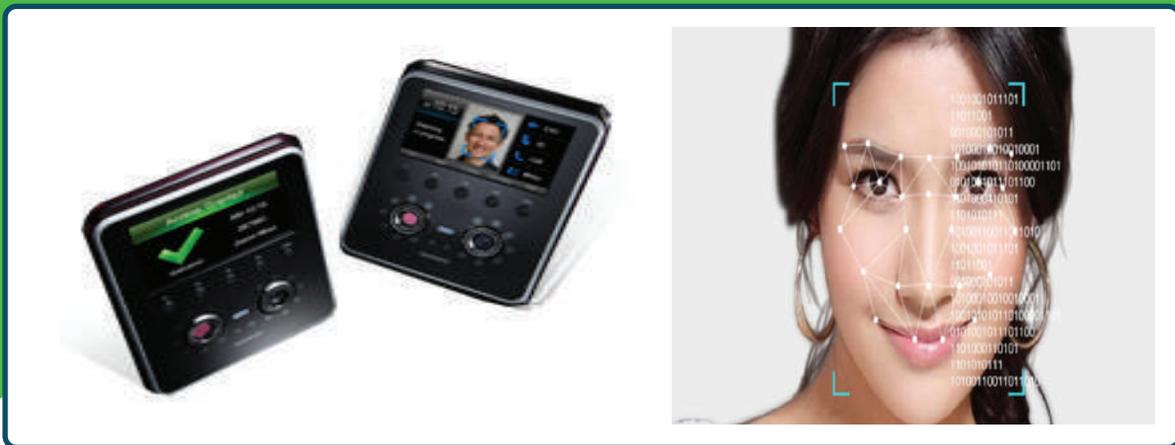

Smart Face Recognition Door Access Terminal

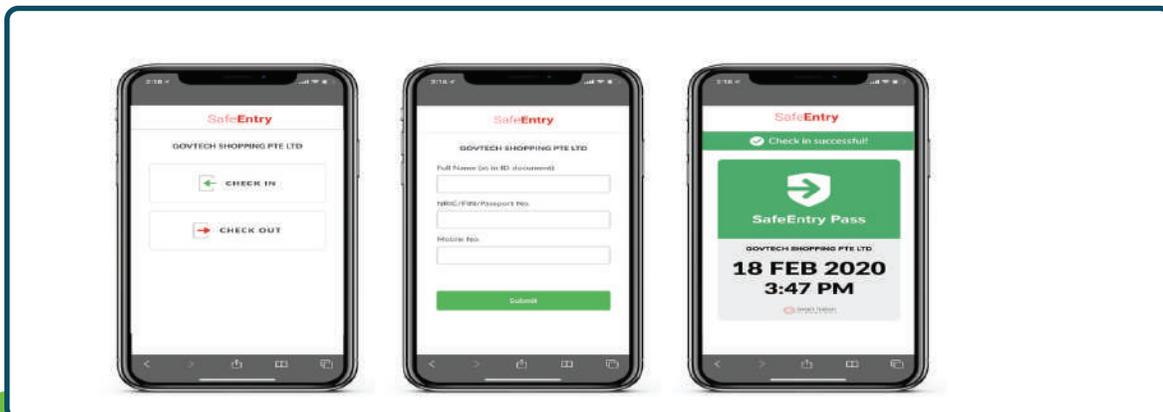

We provide services for FaceStation 2, which is the most advanced face recognition terminal providing loads of the world's best features. Powered by Suprema's latest innovation in facial biometrics, FaceStation 2 offers unrivalled matching speed, accuracy and level of security. With Suprema's patented optic engineering,

FaceStation 2 achieves up to 25,000 lx of operating illuminance which in turn,

High Speed Face Matching

Fever Screening & SafeEntry integrated Solutions

SafeEntry Check-in and Check-out System is Compulsory to Deploy in Singapore as Safety Measures

Our proposed SafeEntry System will provide Safety, well-being and health are important to everyone and applicable in all areas of our life. Whether we are at home, at the office, or in public, safety is absolute.
